

# Online Banking Security Enhancements

Introducing our latest Online Banking feature: **Direct Banking Alerts**

Stay in charge of your finances with notifications of your online account activity. Choose which events you wish to be notified about, and your preferred form of alert – text, email or both! You can use Direct Banking Alerts for the following actions:

**New Payee:** Stay informed when a new bill payee is added to your online banking account.

**Personal Access Code (PAC):** An alert will be sent to your email or phone anytime your Access Code is changed.

**Account Locked Out:** Following failed attempts at answering your Security Question, you will be notified that your Account has been locked.

**Online Login:** Get a Direct Alert anytime your Online Banking Account has been accessed.

**Interact e-Transfer Recipient:** Stay informed whenever a new e-Transfer Recipient is added to your online banking account.

Direct Banking Alerts provide another means to detect fraudulent activities and security breaches. You can speak with any of our Member Service Representatives to learn more about this great addition to First Credit Union Online Banking.
